

# Our Water

All numbers are rounded averages

Annual precipitation increases by approximately 1 inch per 25 miles from west to east in Nebraska.

**Surface storage—less than 5 million AF**  
**Underground aquifer storage — 2,000 million AF**

**BLUE WATER** is liquid water in streams, lakes, wetlands, reservoirs and underground aquifers.

**GREEN WATER** is moisture that returns to the atmosphere through evaporation and transpiration from plants.

**NEWBA**  
**Nebraska Water Balance Alliance**  
*Water for Generations*
